Legend		concrete abstract	descriptive possessive quantitative	experiential locative benefactive basic

Before 1966 (Revolver)

- The Beatles spent much of their time thinking about girls and love. They liked to go out at night and shake until they were dizzy. Sometimes, they got a little light headed, but it was the only relief they got from the tight black chains that a pre-countercultural society had wrapped around them.

After 1966 (Revolver)

- The Beatles preferred to spend their time in a big yellow submarine, along with Sgt. Pepper, Maxwell, and a neighbourly octopus who kept a good garden. They often got lonely under the sea. So every morning, they would come to the surface to say hello to the sun and be reminded of a home that they said goodbye to long ago.
